

Family size distribution of tags from various steps of the Du Novo pipeline

	AB	BA	total nr. of tags (unique, FS>=1):	total numbers *
max. family size =	85	332	DCS (before SSCS building, FS>=1):	16
absolute frequency =	1	1	total nr. of tags (unique, FS>=3):	16
relative frequency =	0.06250	0.06250	DCS (before SSCS building, FS>=3):	16
total nr. of reads (before)	1,312		after DCS building:	25
			after trimming:	17
			after alignment to reference:	16

\* In the plot, the family sizes of ab and ba strands and of both duplex tags were used. Whereas the total numbers indicate only the single count of the formed duplex tags.
