

# Hamming distance separated by family size

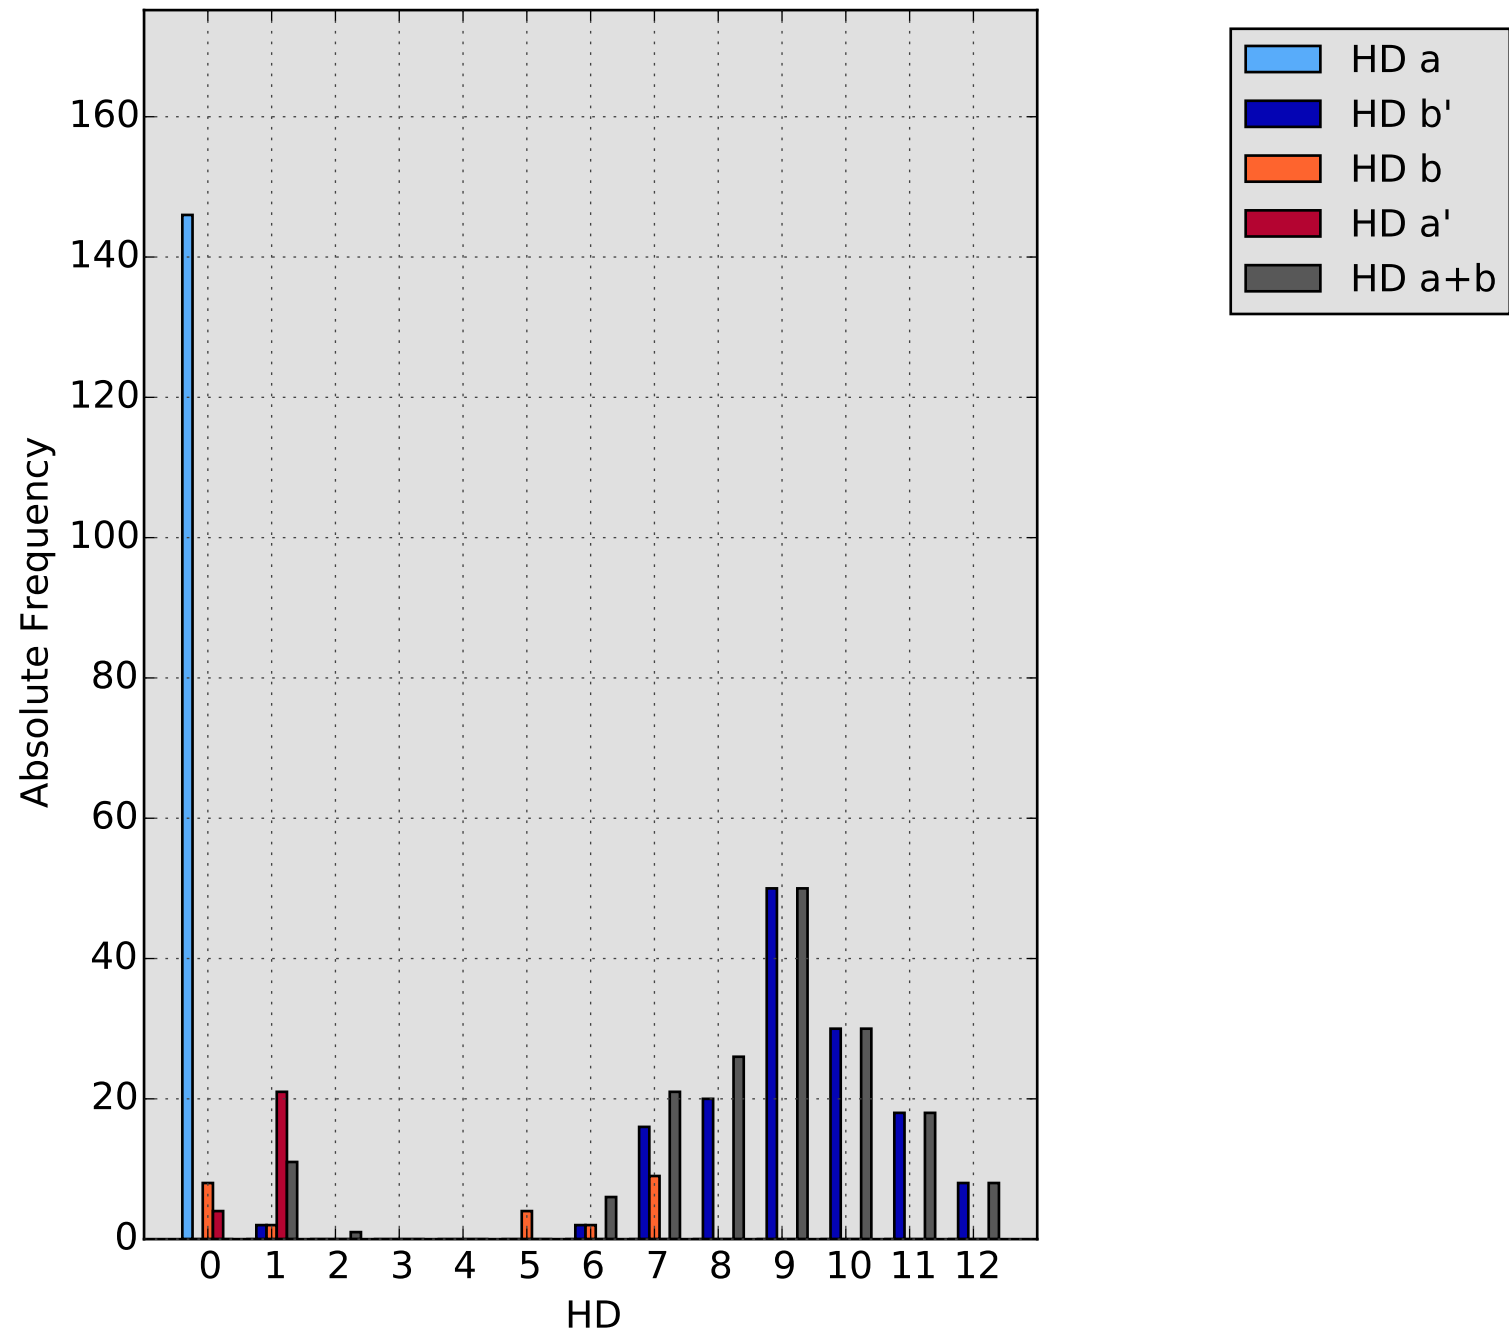

sample size= 20 against 20

# Family size distribution separated by Hamming distance

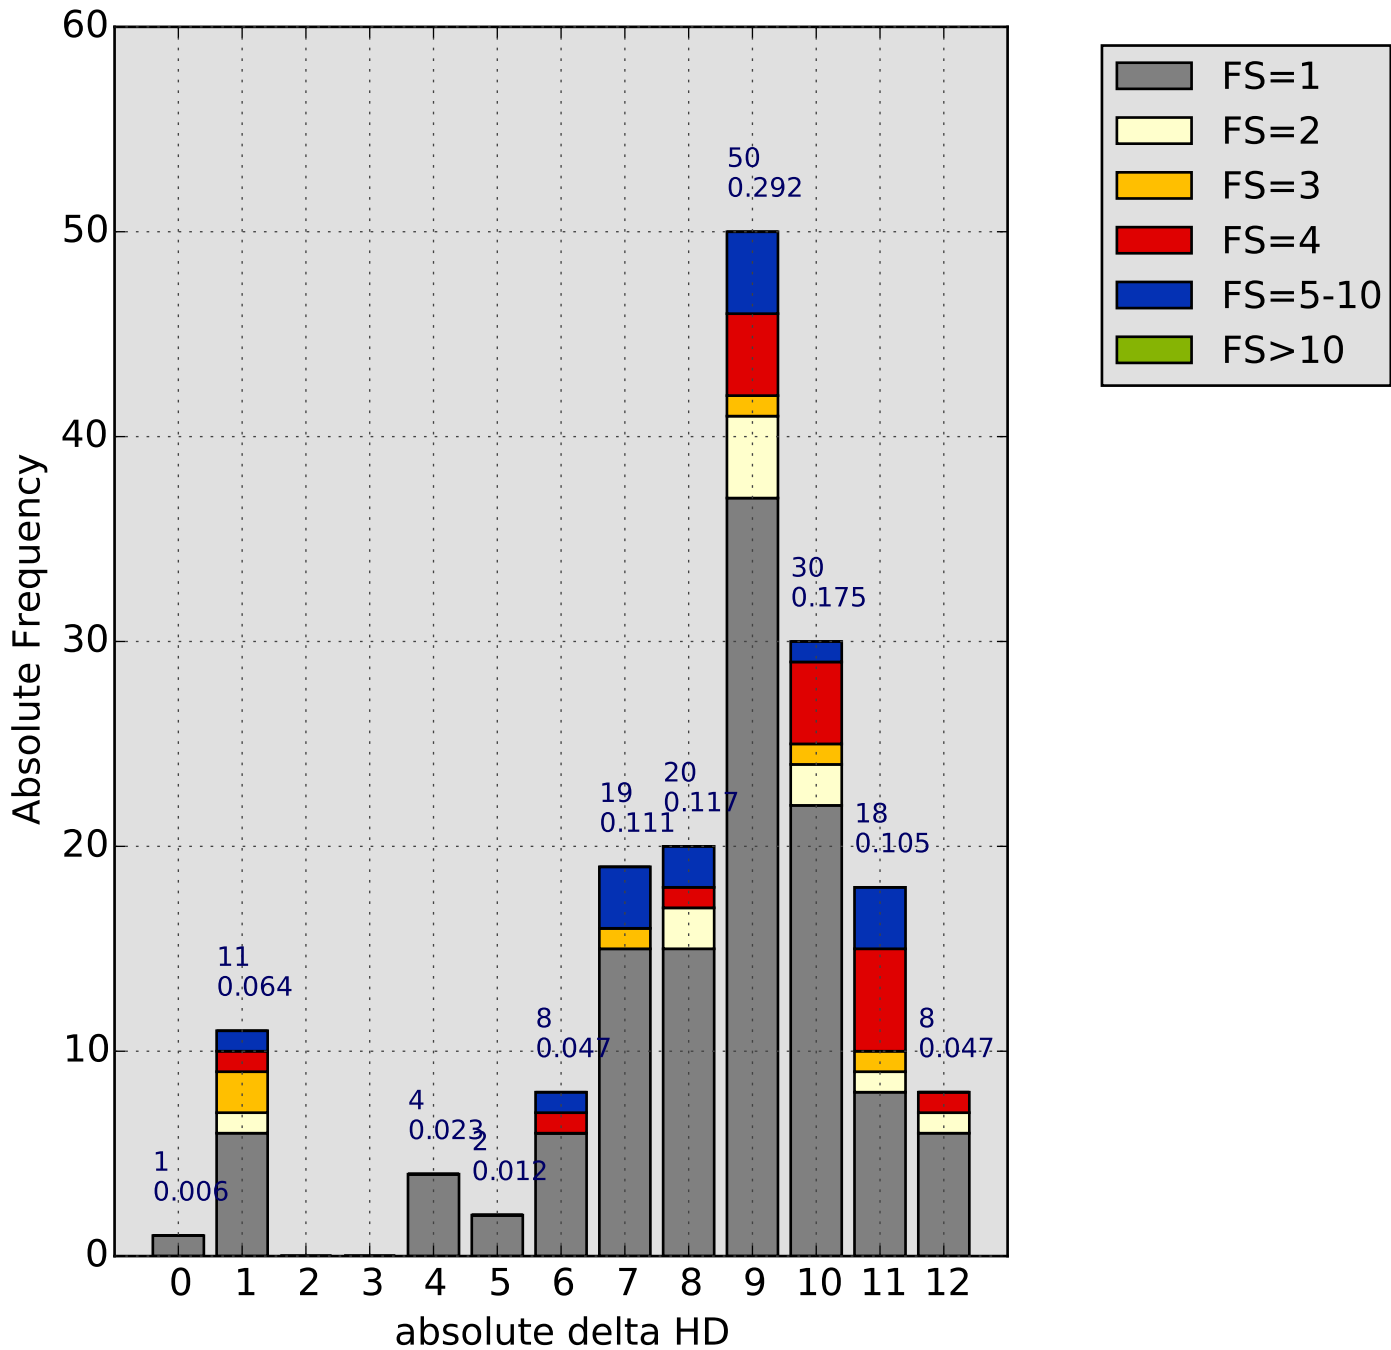

max. family size:	7	singletons
absolute frequency:	1	14
relative frequency:	0.05000	0.70000

# Hamming distances within tags

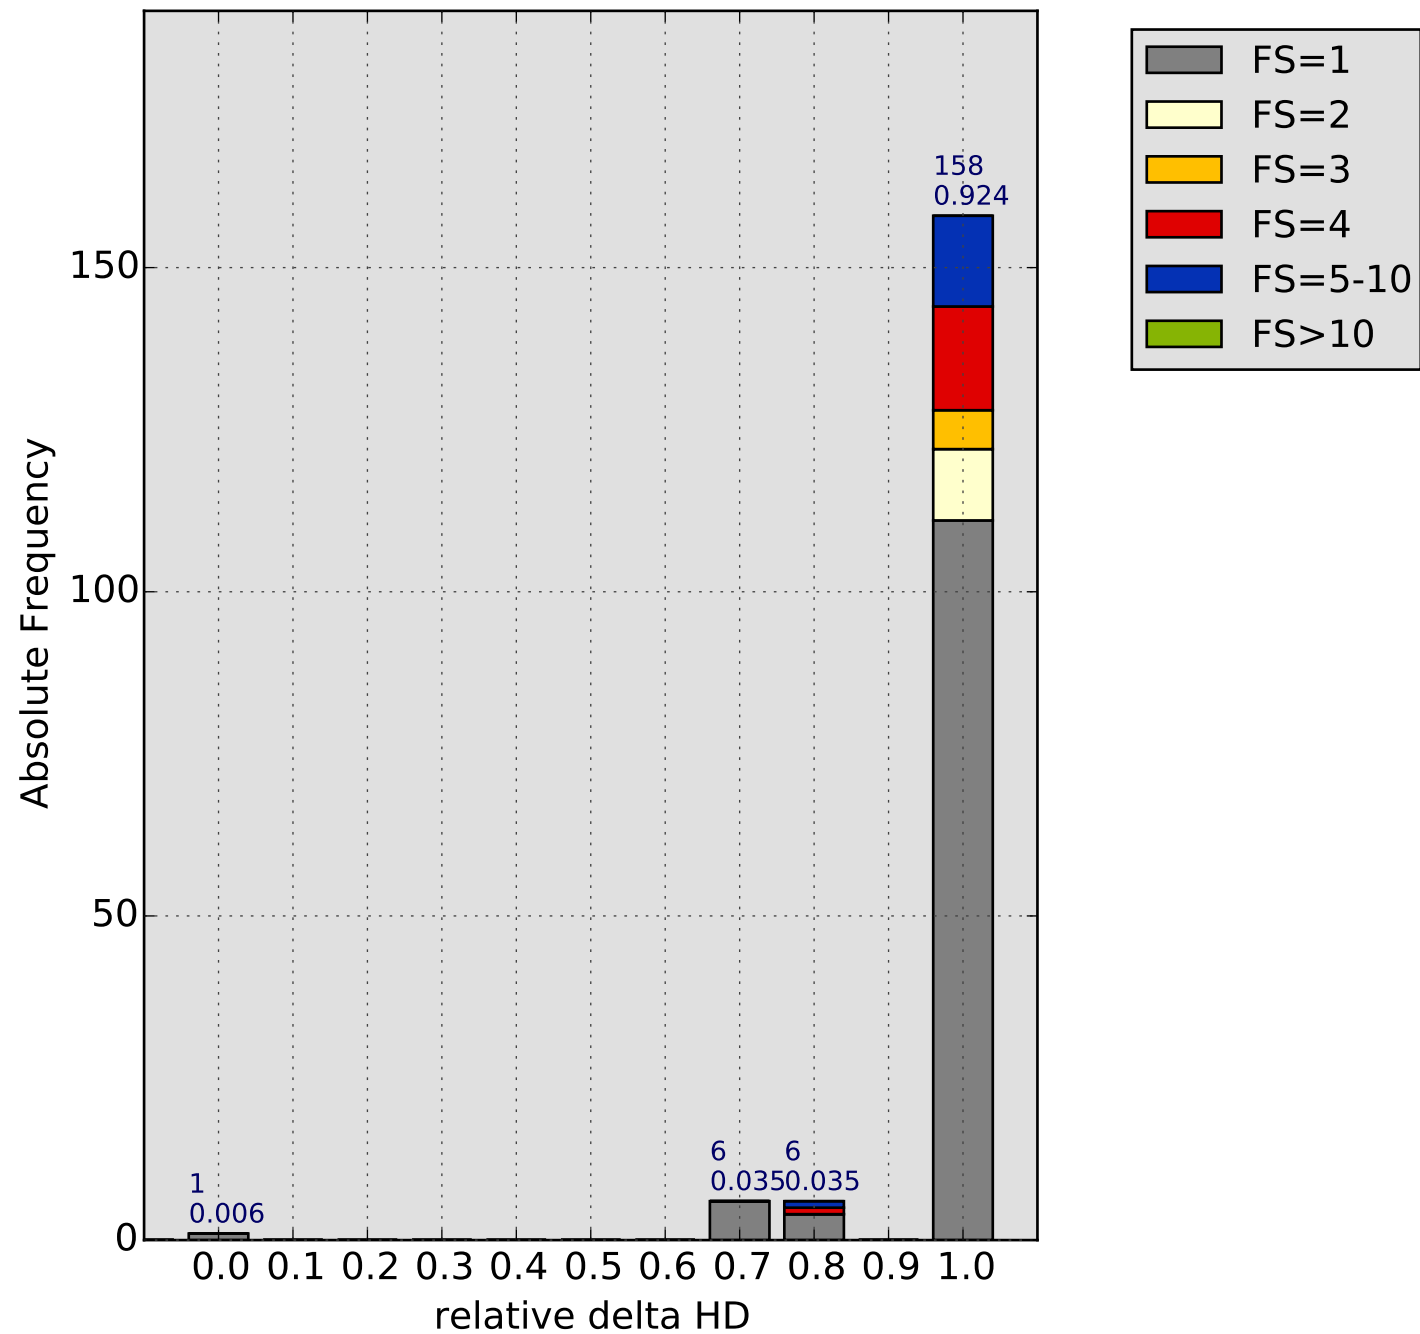

sample size= 1,448 against 20

# Delta Hamming distance within tags

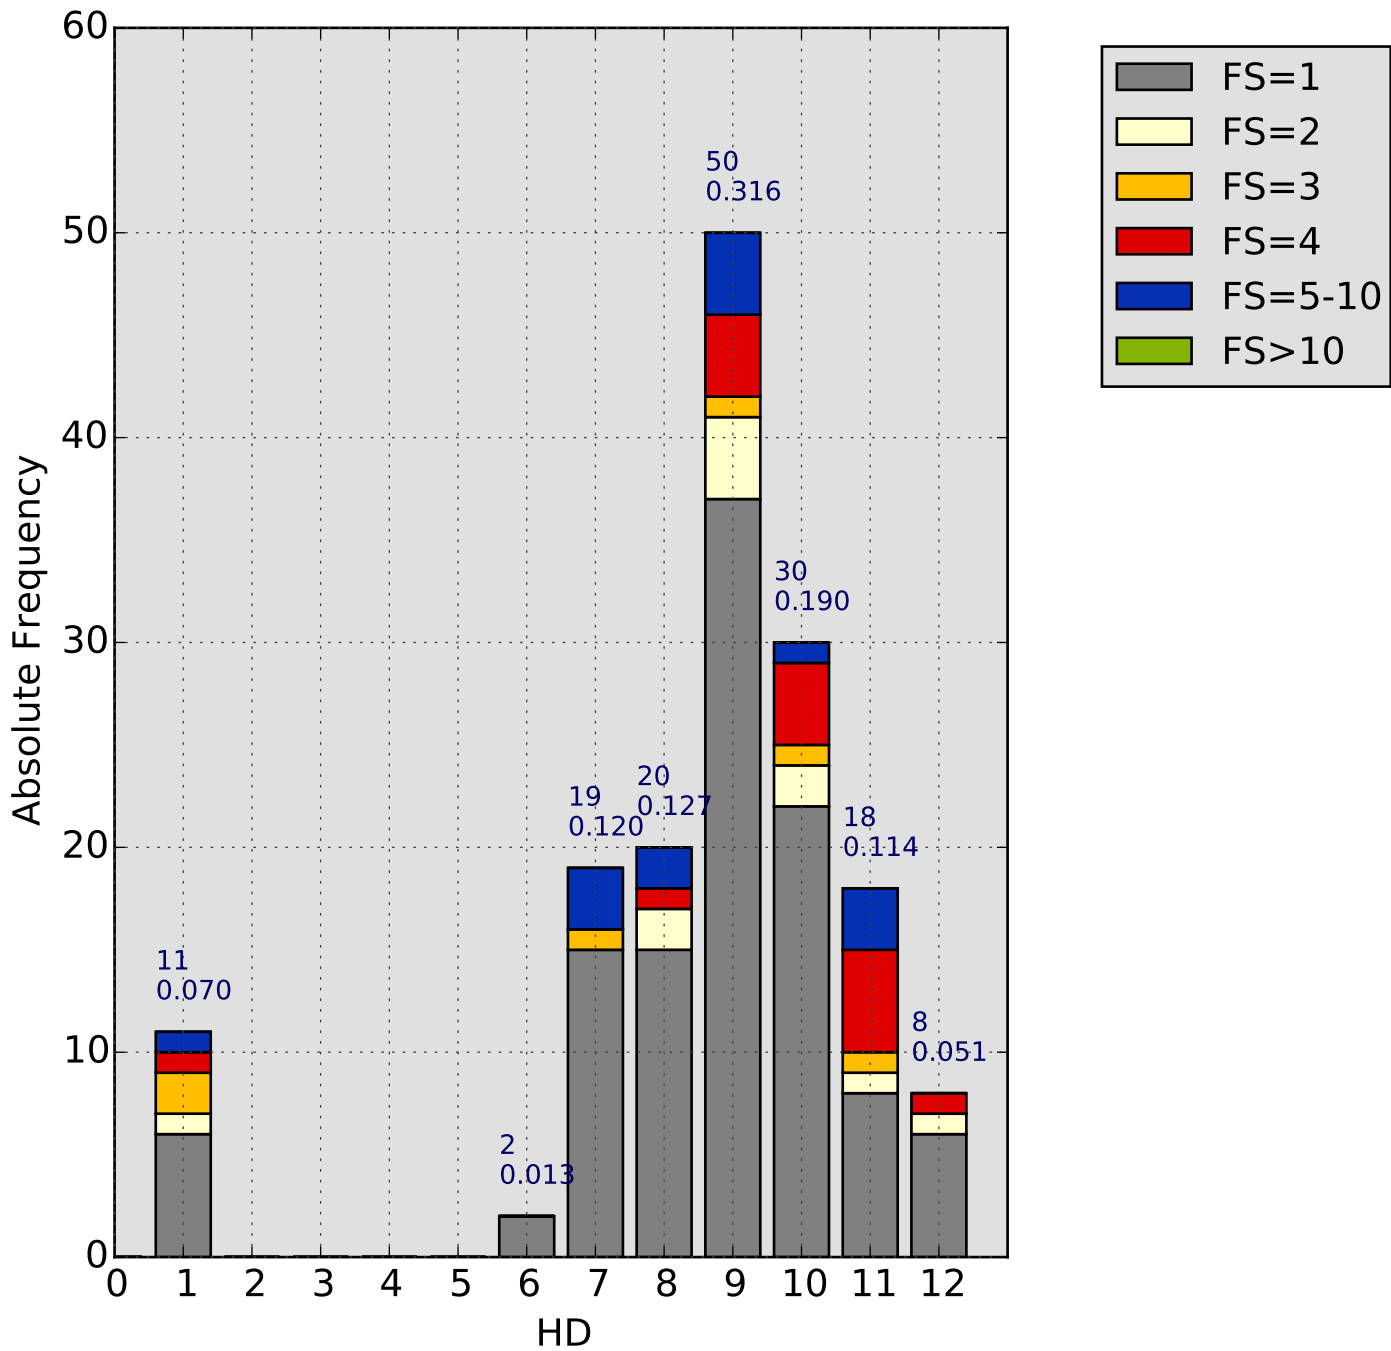

sample size= 171 against 20

# Chimera Analysis: relative delta Hamming distances

sample size= 171 against 20

# Hamming distance of the non-identical half of chimeras

sample size= 158 against 20
